

Narlikar was the key note speaker at conference.

He claimed his new 'Space based solar energy project' could resolve earth's energy needs. He said using space technology sun's energy would be used for lighting up cities and towns.

He explained how astronomy's research had shown that Comet Swift-Tuttle could strike

planet earth on August 14, 2126 and cause devastation. However, space science can prevent the collision by causing a nuclear explosion near the comet, he added.

India's immediate plan was to send a satellite to Mars to find out the existence of microlife. The satellite was scheduled to take off in November this year.

Nearly 1000 school students from Maharashtra, Rajasthan, Punjab, Haryana and Himachal Pradesh are participating in the conference. On day 2, students would be educated about career opportunities in the field of astronomy.

There is a contribution for the enrichment of scientific tradition in the 150th birth anniversary of Ruchi Ram Sahni, a moderniser and the popularisation in this region. Haryana culture, Punjab is undervalued as in

Formally established in 1882, the Panjab University underwent a fair process of growth and development of modern clearly that a number of strains such as the ideology and goal the lack of granting and building the infrastructure down the process and cultivation knowledge in these handicapped talented Punjab
