

Contents

1 Preliminaries on p-Groups	1
1.1 Central Series	1
1.2 Regular Groups	10
1.3 Groups with Large Center	17
1.4 Gaschütz's Theorem and Its Generalization	19
1.5 Pro- p -Groups	25
2 Fundamental Exact Sequence of Wells	29
2.1 Cohomology of Groups	29
2.2 Group Extensions	38
2.3 Action of Cohomology Group on Extensions	41
2.4 Action of Automorphism Group on Extensions	46
2.5 Action of Automorphism Group on Cohomology	48
2.6 Wells Map	49
2.7 Wells Exact Sequence	52
2.8 Extensions with Trivial Coupling	59
2.9 Extension and Lifting of Automorphisms	63
3 Orders of Automorphism Groups of Finite Groups	69
3.1 Schur Multiplier	69
3.2 Automorphisms of Finite Abelian Groups	73
3.3 Ledermann-Neumann's Theorem	82
3.4 Green's Function	93
3.5 Howarth's Function	100
3.6 Hyde's Function	105

4	Groups with Divisibility Property-I	117
4.1	Reduction Results	117
4.2	Groups of Nilpotency Class 2	121
4.3	Groups with Metacyclic Central Quotient	127
4.4	Modular Groups	133
4.5	p -Abelian Groups	137
4.6	Groups with Small Central Quotient	148
5	Groups with Divisibility Property-II	157
5.1	Groups of Order p^7	157
5.2	Groups of Coclass 2	166
5.3	2-Groups of Fixed Coclass	169
5.4	p^2 -Abelian p -Central Groups	177
5.5	Further Results	182
6	Groups Without Divisibility Property	195
6.1	Lie Algebras and Uniform Pro- p -Groups	195
6.2	Existence of Groups Without Divisibility Property	203
	References	209
