Prof. Padmanabhan: A Personal and Professional History	1
Jasjeet Singh Bagla and Sunu Engineer	
Measuring Baryon Acoustic Oscillations with Angular Two-Point Correlation Function.	11
Jailson S. Alcaniz, Gabriela C. Carvalho, Armando Bernui, Joel C. Carvalho and Micol Benetti	
1 Introduction	11
2 The Angular Two-Point Correlation Function	12
3 Cosmological Constraints	16
4 Conclusions	18
References	19
Resonant Disruption of Binary Stars by a Catalytic Black Hole	21
C.M. Boily	
1 Introduction	21
2 Anisotropic Motion	22
3 Binary Stars	25
4 Numerical Examples	26
5 Outlook	28
References	29
Mechanics of Apparent Horizon in Two Dimensional Dilaton Gravity	31
Rong-Gen Cai and Li-Ming Cao	
1 Introduction	31
2 General Dilaton Gravity Theory in Two Dimensions	33
3 Some Solutions of the Theory	34
4 Apparent Horizon	35
5 The Mechanics of the Apparent Horizon	37
References	41

Boundary Terms of the Einstein-Hilbert Action	43
Sambanta Chakraborty	
1 Introduction	43
2 Reconciling Boundary Terms for the Einstein-Hilbert Action	45
3 (1+3) Decomposition, Time Derivatives and Canonical Momenta	51
4 Null Surfaces: Completing the Circle	55
5 Concluding Remarks	58
References	59
Decay of the Cosmic Vacuum Energy	61
Timothy Clifton and John D. Barrow	
1 Introduction	61
2 Background Evolution	63
3 Energy Exchange in the Presence of a Non-interacting Fluid	64
4 Perturbations Generated During Inflation	66
5 Discussion	70
References	71
Understanding General Relativity After 100 Years: A Matter of Perspective	73
Naresh Dadhich	
1 Prologue	73
2 Introduction	74
3 At the Very Beginning	76
4 Self Interaction and Vacuum Energy	79
5 In Higher Dimension	82
6 Outlook and Perspective	84
References	86
Piecewise Conserved Quantities	89
Tevian Dray	
1 Introduction	89
2 Piecewise Smooth Tensors	90
3 Piecewise Conserved Quantities	90
4 The Patchwork Divergence Theorem	91
5 Shells of Matter	92
6 Signature Change	94
7 Lorentzian Vector Calculus	95
8 Summary	97
References	97
Units of the Nonlinear Universe	99
Sunu Engineer	
1 Introduction	99
2 General Features of Nonlinear Evolution	100

3	Correlation Functions, Density Profiles and Stable Clustering	103
4	Self-similar Evolution	107
5	Units of the Nonlinear Universe	109
	References	116
	Self-similarity and Criticality in Gravitational Collapse	117
	Pankaj S. Joshi	
	References	126
	Notes on Semiclassical Weyl Gravity	127
	Claus Kiefer and Branislav Nikolić	
1	Notes on Semiclassical Einstein Gravity	127
2	Quantization of Conformal (Weyl) Gravity	131
3	Semiclassical Weyl Gravity and the Recovery of Time	139
4	Outlook	142
	References	143
	Accelerated Observers, Thermal Entropy, and Spacetime Curvature	145
	Dawood Kothawala	
1	Gravity and Thermodynamics	145
2	Gravity \iff Accelerated Frames \iff Thermodynamics	147
3	Thermal Entropy and Spacetime Curvature	153
4	Concluding Remarks	157
	References	166
