Dr Indranil Banerjee of the biological sciences department at IISER-Mohali said: "To address this issue of antiviral resistance, we used a new host-directed therapy, of attacking the cells that the viruses must enter to establish infection. There is no FDA-approved host-directed drug, so far, for COVID-19 or influenza. Since viruses lack locomotory activity, they exploit the host cell machinery to enter the cells. We found a class of compounds that blocks their ports of entry. We call these compounds diphenylurea derivatives or DPUDs."

The research team identified 5 DPUDs capable of blocking both SARS-CoV-2 and influenza virus by 95 to 100%. These can block the Wuhan, Delta, and Omicron strains of [Covid](https://timesofindia.indiatimes.com/coronavirus) (https://timesofindia.indiatimes.com/coronavirus) and the H1N1 and H3N2 strains of swine flu completely without inducing any resistance in those viruses. The other contributors to the research are Dr Prabal Banerjee of IIT-Ropar, Dr Krishan Gopal of Imtech, and Dr Raghavan Varadarajan of IISc-Bengaluru.

Chandigarh: Households in 80 villages of Ferozepur Jhirka subdivision will soon be supplied with drinking water as the Haryana (<https://timesofindia.indiatimes.com/india/haryana>) government's Ranney well project has been completed.

The project that came up at a cost of Rs 210 crore will soon be inaugurated, chief minister Manohar Lal Khattar said during a high-level meeting with administrative secretaries on Tuesday.

He also launched Haryana Project Monitoring System (HPMS) portal to oversee projects above Rs 100 crore being implemented by various departments across the state. "The topmost priority of the state government is the expeditious execution of all major projects. Project appraisal and review technique (PERT) charts should be made for all ongoing projects to get a clear picture of the timeline, completion percentage and expected inauguration date," Khattar told the officials.

"The department concerned can initially extend the deadline for the project completion at its own level. However, in case of further extension in the time period in regard with non-completion of the project, it will be done either after the approval of the chief secretary or the minister concerned," he added.

Khattar was apprised of the status of the project to improve the water supply system in Mahendergarh's Bhalkhi village, which officials said will be completed by July. The work on

According to this survey, while 81% of respondents in Chandigarh are still hesitant about visiting a mental health expert because they are concerned about what people would think, as much as 96% of the respondents believe that mental health consulting should be included in their health insurance policy.

"Therefore, we are cognizant that when we talk about mental health, the first thing to consider is counselling support, and not necessarily anything to do with hospitalization," said Mayank Bathwal, CEO of the insurance firm. While mental health is still a taboo, according to the report, it was found that the city's residents have a high inclination and dedication towards physical workout. 87% of
